

iQ Drive® Technology constantly adjusts to the slightest change in air temperature for consistent comfort all year round. It is the best of all the worlds combined:

- Perfect Temperature Control
- Ultimate in Comfort
- Proven Technology
- Highest in Energy Efficiency
- Lowest in Operating Cost
- Supreme Dehumidification
- On Board Diagnostics

IQ DRIVE® AWARDS

- 2009 - Consumers Digest Best Buy award for premium air conditioners, iQDrive®air conditioner model FS4BI
- 2008 - Contracting Business Comfortech Product Showcase Award Winner for Forced Air Cooling, iQ Drive®air conditioner.
- 2008 - AHR Expo Innovation award for the Cooling Performance category and the Overall Winner AHR Expo Innovation surpassing all categorical winners, iQ Drive®air conditioner
- 2007 - Dealer Design Award, selected by an independent panel of professional HVACR contractors, iQ Drive®air conditioner

STANDARD
Renewable Energy

What is iQ Drive®?

iQ Drive® is an inverter-driven technology that converts electrical current from AC to DC inside the condenser unit. The inverter board is the brain of the system and the rotary compressor is the heart. Equipment (whether condenser/air handler, furnace, heat pump, thermostat) with iQ Drive® technology has “infinite modulation” (or the ability to adjust or adapt to a certain proportion); it is much like cruise control on a car. Rather than turning on and off to cool or heat the home, the equipment is always on and makes continuous, small adjustments to maintain the cooling or heating demands of the house. This uses less energy and less power, making it more efficient.

Quiet. Smart. Reliable.

iQ Drive® is the Intel for heating and cooling equipment. It is currently the best technology of its kind in the world. Additional benefits include:

- Increased home comfort levels
- Consistent temperature control; even temperature variance
- Uniform mix of air; no hot or cold spots
- Increased efficiency with infinite modulation
- Reduced sound levels (as low as 59 to 72 decibels)
- Constant communication and accurate adjustments to the immediate needs of the home (analyzes home every second)
- Ability to operate at 40% to 100% capacity, depending on load of home. If demand is low, equipment can run as low 15 Hz, versus 60 Hz every time with an on/off only option.

What's Your Home's iQ?

Learn more about iQ Drive® technology. Call us today. It's the smartest thing you can do for your home.

iQ Drive® Complete Comfort System

Get the most efficient heating and cooling system available by switching out your old units for the iQ Drive® Complete Comfort System. There are three major components: the outdoor condenser, the indoor air handler or furnace/coil, and the temperature controller. This entire system is designed to deliver better efficiency, improved air quality and more reliable comfort for years to come.

- iQ Drive® Ultra High Efficiency Air Conditioner
 - up to 24.5 SEER rating
 - efficiently circulates conditioned air throughout the home
- iQ Drive® Ultra High Efficiency Furnace
 - up to 97% AFUE (annual fuel utilization efficiency) (97% of fuel heats the home; 3% is lost)
- iQ Drive® Thermostat Controller
 - brains behind the system
 - On Board diagnostics for service notifications (regular filter cleaning and other service reminders)
 - dehumidification mode -regulate consistent humidity levels throughout the home.
 - Up to 7 Day program capabilities

Get iQ Drive® and manage your total indoor comfort.
