**Standard Renewable Energy Launches SRE Energy Jackpot
Sweepstakes and Instant-Win Game**

--Grand Prize Winner Receives Residential Solar Installation--

June 3, 2009 -- Standard Renewable Energy (SRE) today announced the launch of the "SRE Energy Jackpot" -- a combination sweepstakes and instant-win game.

Residents in SRE's local markets -- Houston, Dallas, Austin, San Antonio, Denver and Phoenix -- will have the opportunity to win a 1kW solar installation for their home valued at \$12,000. To qualify, entrants must own a single family residence, be at least 21 years of age and live within an SRE service-area zip code. Participants across all markets will be entered into a single drawing for the grand prize.

SRE also will give away 2,500 essential energy audits -- a survey of a home to determine how much energy is wasted and recommendations for improving its efficiency.

Additionally, 250 sweepstakes entrants will win SRE Home Energy Cost Monitors, which provide homeowners answers to these and other energy-related questions:

- How much electricity is used while you are away?
- How much electricity do your appliances use as they are running?
- How much does it cost to leave your lights on?

--more--

Standard Renewable Energy Launches SRE Energy Jackpot Sweepstakes and Instant-Win Game -- Page 2

Qualified entrants will be able to play a slot machine-like flash animated game where the tumbler roll will reveal whether they won instantly -- either an essential energy audit or SRE Home Energy Cost Monitor. SRE is offering qualified entrants who do not win an instant prize, the opportunity to come back and play once a day for every day until the sweepstakes ends or they do win. Additionally, at the end of each playing session, entrants will be able to forward the game via email to friends through the "Refer-a-Friend" feature.

The SRE Energy Jackpot is the second sweepstakes contest SRE has sponsored this year. In January, SRE launched the "Sunbelievable Sweepstakes," which awarded a grand prize package worth \$33,000 in each of its market that included a 2-kilowatt solar system, a new heating, ventilation and air conditioning (HVAC) system.

"We feel that sweepstakes like 'Sunbelievable' and 'SRE Energy Jackpot' help educate consumers on the benefits of renewable energy sources," said John Berger, CEO of SRE. "It is a fun way to engage people to learn how they can not only save money, but preserve natural resources."

The SRE Energy Jackpot officially began on May 18 and will end on June 30. For more information about the sweepstakes, please visit www.sre3.com and look for the SRE Energy Jackpot button to play.

About Standard Renewable Energy

Founded in 2006, Standard Renewable Energy (SRE) is the nation's largest Distributed Energy Services Company (DESCO) and leading provider of energy efficiency and on-site renewable energy solutions for homes and businesses. Products and services include solar and wind energy systems, energy monitoring services, energy audits, high-efficiency heating and cooling products, high efficiency insulation and lighting, solar window film, and more. For further information visit their website at www.sre3.com.
